

CONSULTANCY AND TRAINING

Consultancy

Our technical experts provide answers to all your questions regarding choice of material, surface treatment of stainless steel, special alloys and corrosion problems.

We consult regarding

- treatment procedures for stainless steel surfaces
- planning and construction of installations for the chemical and electrochemical surface treatment of stainless steel
- surface treatment of vessels, tubes and fittings for specific areas of application
- choice of material
- service on site

and offer support for

- inspection of installations (e.g. borescope)
- expertise in corrosion questions incl. refurbishing recommendation and cost estimate
- engineering und issuing specifications
- training and seminars about stainless steel as well as surface treatment and welding technology
- planning, organisation and surveillance of on site operations.

Training

We offer In-house seminars for ongoing topics and questions concerning surface treatment of stainless steel according to the individual requirements of your company.
